

Faculty-led Study Abroad Program

Earn college credit in GEO ENG 5001 or GEO ENG 6001

Visit Cape Town, Johannesburg and Victoria Falls, explore the Kruger Game Preserve, Hwange National Park and the Cradle of Humankind, tour active coal and gold mines, and walk through cultivated forests and plantations. You'll have the opportunity to meet with the Council of Scientific and Industrial Research, and the Department of Water Affairs and Forestry, and more!

This course provides an exciting opportunity to do research in South Africa on various topics of interest. Topics may include: coal mining, alternative energy sources, mining (metals), diamond mining, radioactive mine dumps, acid mine drainage, water resources, natural and mining-induced earthquakes, expansive clays, global climate change, labor-based construction practices, highway construction practices and more.

Contact Dr. Anderson to discuss research topics.

Registration Deadline is October 1

Enrollments after this date will be accepted so long as arrangements can be completed.

**DECEMBER 28, 2018 –
JANUARY 13, 2019**

**JOHANNESBURG,
SOUTH AFRICA**

EARN 3 CREDIT HOURS

COST: \$6,300

The course fee includes tuition, airfare, in-country travel, accommodations, National Park entrance fees, and required insurances. Visa fees, meals and some optional event fees are not included.

FACULTY LEADER

Dr. Neil Anderson
Geological Engineering
nanders@mst.edu

Dr. Neil Anderson's research focus includes the application of geophysical technologies to geotechnical, structural and environmental engineering investigations, archeology, hydrogeology, hydrocarbon and mineral exploration, and geologic mapping.
