

Faculty-led Study Abroad Program

Earn college credit in Psychology 4992 and Mechanical Engineering 1720

Join us for 17 days of exploration and learning as we travel through Rome and Florence to examine how culture shapes human psychology and the design process.

Program Highlights

- Spend four days in Rome and 12 days in Florence, immersing yourself in Italian culture.
- Tour the Ducati Factory production line to see how some of the fastest motorcycles in the world are made!
- Learn about modern life in Italy by interacting with local business owners, guest speakers, and Italian students.
- Experience architectural engineering feats such as the Cathedral of Santa Maria del Fiore, Ponte Vecchio, the Colosseum, and St. Peter's Basilica.
- Learn how culture influences human attitudes and behavior and apply this knowledge to engineering design.
